While drinking wine with a party of women who frequented the house, Hatch ostentatiously displayed a \$1,000 bill, which was afterwards known to be one of the bank notes which he had

The women wanted to look at it and mass it around the company.

It went into the hands of first one girl and then another and Mr. 'Red' Leary and his friends examined it curiously.

In the course of its perceptinations the bill mysteriously disappeared.

Hatch went to the Thirtieth street police station in wild excitement and reported his loss, giving his name as P. A. Houston and saying he was a ruined man if the bill was not found.

A squad of police went to the house and looked for it. All the women were searched and O'Brien was arrested. Leary disappeared.

The bill was never found, and a few days afterwards Hatch failed to make his appearance at the office of the Company.

It then came out that he was short more than \$\$,000 in his accounts and that he was also the 'P. N. Houston' who lost the one-shousand-dollar bill at Mollie Gray's, and whose identity had so mystified the police and the reporters.

Recipe: To keep a husband at home even-

Divers undispoted authorities aver that husbands are prone to spend their evenings away from the home fireside. They go to the club. the theatre, the lodge. They have "business attend to, or they are in politics, and must "see" several people. They—well at any rate there is something, some strong attraction which entices them away from home after din-

children, and at bedtime they tuck them in their little cots. Wives who are not mothers mope or seek diversion in society, or waste silly tears of happiness over novels that invariably lead their soulful heroines into marriage, and lonesome evenings. For never was there a wife who didn't crave the companionship of the man to whom she had given her heart and surrendered her independence, and in whose behalf she devotes all her womanly effort.

Wives, young wives and wives not so young, recall how devoted Reginald used to be when they were only courting. Reginald used to come up to papa's three times a week and stay so late that he departed on tiptoe, so as not to awaken "the old gentleman," but now he is so usy that "wifey" hardly sees him.

But there are wives, and one can distinguish hem when he meets them, who proudly and lovingly boast that their married lives have been foretastes of heaven. They have been not only helpmeets but companions to their hus-bands, and they invariably declare that it is because they know how to keep John at home evenings.

The evenings are growing longer now, and many months of dreariness is in store for some neglected wives if something is not done. Therefore, for the benefit of the wife who has lost her recipe, or who never knew how to keep her husband at home, The Evening World

comes forward with its accustomed thoughtfulness, and offers a prize of a gold double eagle for the best recipe for keeping a husband at home evenings. competition is open to all the readers of

that Cronin Was Murdered.

(SPECIAL TO THE EVENING WORLD. | CHICAGO, Oct. 26,—The State fully realizes the eccessity of making a careful case against the men who are on trial for the murder of Dr.

Having, as they consider, clinched the proof that the dead body sound in the sewer basin was that of the missing man, the prosecuting attorneys next undertake to show that death was the result of murderous violence.

This part of the case was continued this mornng from yesterday. Nothing could be more positive than the testinony of the witnesses for the identification of the body, and of it all none was more interest-

ing than that of Dr. Lewis, the dead physician's

dentist.

This witness identified as his work the peculiar plate of false teeth taken from the mouth of the corpse, and went on to describe his operations upon his patient's mouth, traces of which he found in the dead man's mouth.

He had also the plaster of Paris cast from which the plate was made.

There was a decided sensation when the plate of four teeth was produced in the court-room and found to tally with the doctor's description in all respects.

Even the prisoners were agitated.

The only break in the testimony about the teeth was when, on cross-examination, Assistant County Physician Expert, who removed the plate from the mouth of the corpse, swore that a tooth on the right end was broken, while in the plate produced in court the broken tooth was on the left end.

When the next step, that of proving death by violence, was taken up, Dr. Egbert again became embarrassed and uncertain on cross-examination, but Dr. Charles F. Perkins testified

When the next step, that of proving death by violence, was taken up. Dr. Exbert again became embarrassed and uncertain on cross-examination, but Dr. Charles F. Perkins testified unhesitatingly that concussion of the brain, caused by blows with a blunt instrument, on the head, had produced death.

Dr. Perkins gave scientific facts in support of his declaration, such as that of the right side of the heart being filled with blood while the left was drained.

Dr. Perkins, also, testified to finding outs

was drained.

Dr. Perkins also testified to finding cuts
which had opened the facial and occipital
arteries and might have caused fata heuorrhage, even if the blows had not done the

orrhage, even if the blows had not done the work.

Also preserved stomach and the skull of the dead man were produced in court, and a shiver ran through the crowd as the ghastly objects were presented.

The court-room was dark this morning and the proceedings were conducted by the light cast from a score of electric lights and gas jets.

County Physician Todd was the first witness.

Dr. Egbert's stumbling testimony was somewhat I obstared up by the declaration of Dr. Todd that only he said Dr. Eghert knew the combination of the safe in which the plate had been deposited, and that witness had not even opesed the rafe between last March and to-day, the plate having been deposited in the safe May 23.

Dr. D. G. Moore, who assisted at the autopsy, testified substantially like Dr. Perkins as to the wound on the law severing the facial artery and that on the back of the head severing the occipital artery.

that on the back of the head severing the occipital artery.

Attorney Forrest, for the defense, brought
out the fact that the only evidence of the severance of the arteries was that they did not appear where they shruld during the autobey.

Instead of searching for the severed ends,
the surgeons had taken for granted that the
arteries had been cut.

Attorney Forrest finally drew from the doctor
an acknowledgment that he had read Dr.
Egbert's testimony in the morning papers, and
under the Court's ruling, excluding all witnesses
from court, challenged the witness's testimony.

To the utter astonishment of the attorney for
the State, the Court said:

"I will rule the costimony incompetent and

"I will rule the testimony incompetent and order it stricken out." Instantly Prosecutors Hynes and Mills were on their feet with earnest protests.

They argued that such a ruling would give all the advantage to corrupt witnesses who would perjure themselves by saying they had not read the papers. Honorable witnesses, on the other hand, who acknowledged they had read the papers, would have their testimony ruled out.

Judge McConnell finally reversed the ruling.

CHOKED AND ROBBED

Carpenter Wallace Dogged to His Own

A bold highway robbery, made possible by the darkness of the streets at night, was reported at Police Headquarters to-day.

He lives on the top floor of No. 224. Thursday night at 9. 30 o'clock he was coming home, and was attacked while trying to open the vestibule door of his residence.

Robbers who had been in hiding in the vestibule, or had followed him home, seized him by the throat, jammed his head through the glass pane, and robbed him of his valuable gold watch. Wallace staggered out nearly strangled. The shop-keepers ran out. They saw a man making for Second avenue on a dead run. Before they knew what had happened he was gone. The robbery was forthwith reported at the Thirty-fifth street police station, and F. Twirschnik, tailor; George Stumpf, bootmaker, and G. Fisher, cigar-dealer, who all keep stores at 224 East Thirty-fourth street, gave the police as good a description of the robber as they could.

Detective Walaskey has been working on the case since. He said to-day that he had not found the thief, though he had ascertained that he dogged Wallace on his way home.

John Dillinger Locked Up Suspected

of Being Her Murderer.

What at present looks very much like a murinet Police Station, Brooklyn, by the suppose nurderer, John Dillinger, of 32 Bartlett street. Dillinger, who is a scavenger, accompanied by John Doxey, of 245 Monroe street, came to the police station and informed the Sergeant in charge that he had a dead woman at his house. When asked who she was he said it was his wife, and claimed that she had died suddenly. Dillinger was intoxicated, and pending an investigation was locked up.

Doxay, when questions t, said that Dillinger met him last evening, and a-ked him to go home with him and drink some beer. On the way Dillinger told him he had had a fight with his wife, during which he struck her once or twice.

When they entered the room Mrs. Dillinger was sitting in a chair, holding her head is her hands. She told Dexey that she had a terrible pain in her head, and had no sooner spoken than she fell forward to the floor, dead.

Dillinger than dragged the dead woman into the bed oom and placed her on the bed.

Roundsmen Hayes and Detective Brady were detailed to investigate the case. Pending an inquest by Coroner Lindsay both men are held at the station house. When saked who she was he said it was
